

Environmental Policy

It is our policy to minimise our impact on the environment wherever practicably possible by ensuring that environmental issues and awareness remain at the forefront of every decision we make.

Key points of our policy:

Swift Removals and Storage UK Ltd . promotes recycling or re-use of packing materials. We offer a free collection service of used boxes and where possible we reuse the boxes. If the boxes cannot be reused we recycle them.

When planning routes we aim to maximise efficiency and therefore minimise the impact on the environment. Wherever possible we plan back loads and take into account likely congestion and different times of the day when deciding on a route.

Where we are required to dispose of goods we choose to only use waste transfer stations that recycle.

We ensure that all company vehicles are well maintained by way of daily inspections and ten weekly full mechanical inspections to make sure they are operating efficiently. These checks also allow us to take preventative maintenance, which helps minimise our environmental impact.

When purchasing new vehicles, the vehicles impact on the environment is of key importance to us.

By ordering large quantities of required materials and storing them at our depots we are able to reduce the amount of deliveries we receive and therefore help our suppliers reduce their impact on the environment. We only choose suppliers that maintain good environmental practices.

Our vehicles all meet emissions standards of Euro 3 or above. To achieve this we have had particulate traps fitted to our vehicles, which would not have met Euro 3 standard without them. This has helped us reduce our vehicles impact on the environment.

The Company operates in compliance with UK Health & Safety Legislation and has a Health & Safety Policy which is available to all employees. It is fully aware of it's environmental obligations and attempts to comply with all environmental guidelines issued by the UK government and by local authorities.

The policy is aimed at developing in each employee a sense of personal responsibility for quality improvement and, through adherence to this policy by all personnel in the company aims to demonstrate its commitment to quality.

The system is mandatory for all employees.
